

SmartCare Business Intelligence™

BUILT ON THE CONCEPTS SET FORTH BY KIMBALL AND ROSS

Streamline's data warehouse is designed to efficiently maximize reporting over time.

With SmartCare Business Intelligence

The platform can be used to jump-start creation of an enterprise data warehouse and incorporate information from multiple data sources such as accounting systems, human resources, etc.

The Streamline data warehouse is designed to provide organizations streamlined business intelligence.

Streamline's data warehouse is designed to maximize reporting of large data over time efficiently. In addition to a nightly process that pulls data from SmartCare™, the data warehouse is architected to allow sourcing of data from any data source.

Data Warehouse

- SmartCare database optimized for data 'input'/data warehouse is optimized for data 'output'
 - Serves as an aggregate reporting platform
- Framework for data integration from other data sources
- Implement specific state reporting requirements/create compliant files
- Upload state response and provide error reporting

Business Intelligence

- Analyze your outcome measurement needs
- Build a tabular data model and deliver your BI staff the data they require
- Historical data captured for longitudinal studies including
 - Point-in-time snapshots retained
 - Trend Mining capabilities
- Forecasting of business programs and changes in client populations
- Business Decision Support
