SmartCare™ | BEHAVIORAL HEALTH EHR
by Streamline Healthcare

SmartCare™ is a single, Enterprise platform that allows for the delivery of services in inpatient and residential, and intensive outpatient and day services settings, enabling organizations to provide care wherever needed.

All levels of care provided through SmartCare™ incorporate its intelligent, personalized capabilities in Clinical Care Management, Revenue Cycle Management, ePrescribing, and remote and offline access via SmartCare™ Anywhere.

Benefits: Inpatient and Residential

Comprehensive functionality that includes flow sheets, white boards, bed boards, and Electronic Medication Administration Management (eMAR). It also includes referral tracking and scheduling.

Allows for the managing of client populations in groups, programs, and tracks.

Benefits: IOP and Day Services

Robust attendance functionality that includes attendance tracking, including the ability to check clients in and out multiple times per day; notes to track activities; and the ability to roll up service time into a single charge.

Easy accommodation of groups, including flexibility in configuring and billing.

eMAR capabilities, including group dispensing.
