

SmartCare™ Anywhere is a fully integrated mobile solution that enables online and offline access to the platform, freeing users to work seamlessly in settings where there is limited or no internet access, including rural areas, correctional facilities, and client homes.

## Key Benefits

Frees users to work in rural areas and in the community with or without internet access

Seamless access to all information and functions needed to provide care in the field

Integrates with the client treatment plans, diagnosis, and data fields.

Touch-screen user interface capability for ease of use on devices such as tablets and smartphones.

Data sync function eliminates the need for manual data entry after returning from the field.

## Key Functions

SmartCare™ Anywhere provides a mobile clinical solution that enables online and offline access to the platform in settings with limited or no internet access, including rural areas, correctional facilities, client homes, etc.

Anywhere is Streamline's tool for mobile providers. It is designed to function on smaller devices such as tablets and smartphones; and takes full advantage of mobile technology such as touch screen, voice to text, navigation tools, image capture and file upload/download.

---

## Key Functions

From a mobile device, providers can review caseloads, view client details, schedule appointments and view care team calendars. Healthcare workers can complete assessments, generate service notes and collect electronic signatures from the provider and client. Anywhere is integrated with the client treatment plans, diagnosis, and other discrete and narrative data fields in SmartCare™.

Updates to client information and documents are synchronized automatically with the SmartCare™ system. When internet service is unavailable, the provider can work in offline mode and the device will automatically sync with SmartCare™ when the internet connection is restored.

SmartCare™ Anywhere's online and offline capabilities allow healthcare providers to work in the community from anywhere.
