

SmartCare™ Foster Care and Adoption integrates all the main aspects of foster care, from potential placements to discharge from homes, on one platform. Its capabilities include functionality for licensing/approvals, placements, case management, child intake, investigations, eligibility, and payments.

Key Benefits

Set up all placement families for adoption, foster care, residential, and shelter.

Track placed and unplaced children, keep an inventory of beds available, and check for availability of beds by type of placement for beds available.

Manage placement families' application submission, background checks, training, approval, and renewal.

Maintain information about the child, including caseworker, court case, attorney, DHS Monitor, etc.

Manage detailed information about the placement.

Document caseworker contact, visits, service coordination, and notes.

Calculate and track payments to families and outbound billing.
