## Key Functions

Designed by people with Behavioral Health and Human Services experience, SmartCare™ I/DD is tailored specifically to organizations that serve people with intellectual or developmental disabilities.

The solution is comprehensive and flexible enough to incorporate a broad range of programs designed to foster clients' independence, productivity, and participation in community life. It supports adolescent and adult as well as outpatient and residential services.

SmartCare™ I/DD's robust assessment tool identifies employment status, income, educational attainment, housing (homelessness, housing conditions, etc.), diet/access to food, tobacco use, alcohol and illicit drug use, physical activity, etc.

SmartCare™ I/DD enables the creation of care plans with goals and objectives to suit each individual's needs. It makes it easy to track an individual's progress and note successful goal completion. It supports mainstreaming clients.

SmartCare's Revenue Cycle Management functionality includes I/DD billing and reimbursement functions, and it easily incorporates family and caregiver contributions and reimbursements.

The SmartCare™ platform's comprehensive functionality enables the coordination of care for developmental and physical health in the same system for true whole-person care. Among other things, medications can be prescribed from within the platform with the SmartCareRx™ function.

I/DD users can also access SmartCare™ Anywhere, a fully integrated mobile solution that enables online and offline access to the platform, so users can work seamlessly in offsite settings and even where there is limited or no internet access.
