

SmartCare™ is a true enterprise EHR technology platform for Behavioral Health and Human Services. Hosted on the Azure cloud, it has a highly stable and secure infrastructure. Its open architecture is flexible and extendible. Its robust single platform greatly reduces the need to connect with, maintain, and secure disparate systems.

Key Benefits

Subscription Offering provides the advantages of this model but with more local control than a typical SaaS offering.

Azure Cloud Hosting with a nationwide footprint and high degree of availability, redundancy and disaster recovery—all backed by the world-class strength of Microsoft.

High Levels of Security based on Azure's platform and data centers, which were created using some of the most rigorous security and compliance standards in the world.

Single Client/Tenant Architecture providing for greater flexibility and performance.

Single Platform that manages all types of services across all levels of care in a single application, which greatly reduces the need for organizations to purchase, connect with, maintain, and secure disparate systems.

Fully Web-Based Application that runs on any device with Google Chrome or Microsoft Edge.
