

Since 2003, Streamline Healthcare Solutions has focused exclusively on Behavioral Health and Human Services. The company is a trusted partner in building innovative technology solutions that empower organizations to improve the quality of life for those in need.

Streamline's SmartCare™ is an enterprise, cloud-based, single-platform, intelligent Electronic Health Record (EHR) solution. Ideal for multi-faceted organizations who offer multiple types of services, it enables them to provide truly integrated care management and to improve organizational efficiency.

## About Streamline

Streamline was established in 2003 by co-Founders David Ryland and current CEO Javed Husain. Each has over 25 years of experience with behavioral health software solutions, and they have successfully designed, developed, and deployed two different applications over their careers.

Streamline today serves over 100 Behavioral Health and Human Services Organizations in more than 25 states. The company employs over 350 people, of which roughly 90% are customer focused, enabling Streamline to provide a high level of customer support.

## About SmartCare™

Streamline's SmartCare™ platform sets a new standard for Behavioral Health and Human Services EHRs. It provides organizations with a number of key advantages:

- **Enterprise.** SmartCare™ is a true Enterprise EHR platform. Ideal for multi-faceted organizations that provide multiple types of services, it provides a more comprehensive, seamless approach to operations, care, and analytics.

[More](#)

- 
- Single Platform. SmartCare™ manages all types of services across all levels of care in a single platform, rather than trying to connect disparate systems. Its unified architecture, interface, processes, workflows, and reports enable truly integrated care management and improved organizational efficiency.
  - Intelligent. SmartCare™ is an intelligent application designed to understand user roles, preferences, and workflows intuitively, which promotes flexibility, ease of use, and efficiency. With SmartCare™, users control how the EHR works—not the other way around.
  - Personalized. Because it was designed by people with extensive Behavioral Health and Human Services experience, SmartCare's interface and processes are personalized for each user, their role, and the clients they serve. The result is a highly intuitive and easy-to-use system that reduces time-consuming and repetitive administrative tasks and frees users to focus on helping people.
